PART 1

INTRODUCTION

INTRODUCTION

GENERAL

1 This Part List is applicable to the Royal Canadian Air Force Sabre 5, 5A & 6 Aircraft, manufactured by Canadair Limited, Montreal, Quebec, Canada.

2 This Part List describes the items installed on the aircraft, according to engineering drawings, at the time it is delivered by the manufacturer, and includes all modifications requested by the RCAF.

PURPOSE OF THE PART LIST

3 The Part List has been prepared to provide identification of parts and to ensure the ordering of correct spares.

NOTE

In order to expedite the delivery of spare parts, the Aircraft Model, Part Number and Title should be supplied when requesting parts. To avoid costly delay in procurement, the exact position, function, and other pertinent data contributing to the adequate definition of parts shall be supplied with the requisition.

LIMITATIONS

4 The Part List is not to be construed as an authority for assembly or dis-assembly procedure. Overhaul or repair should be done by authorized personnel using the applicable Engineering Orders.

CODING

GENERAL

5 In order to conserve space and to facilitate quick reference, code systems have been introduced for Vendor Items, Standard Parts, and Government Furnished Equipment Parts.

VENDOR ITEMS

6 Vendor items are identified by three capital letters in parentheses in the nomenclature column. Code letters are listed alphabetically against the relevant manufacturer's name and address in List 1.

STANDARD PARTS

7 All Canadair and North American Aviation Standard Parts are indicated by (CAN) and (NAA) respectively.

GOVERNMENT FURNISHED EQUIPMENT

8 All Government Furnished Equipment is indicated by (G.F.E.).

USAGE CODE

GENERAL

9 The purpose of a Usage Code is to indicate parts which are limited for use on specific aircraft only.

DECODING

10 Usage codes shown in the Part List are the Royal Canadian Air Force Serial Numbers, less the first two digits. Decoding to determine the serial numbers of the aircraft on which the parts are used may be accomplished by adding the number 23 in front of the usage code shown. Examples: The usage code in the Part List is 001-370; the decoded answer would indicate that the part is effective on Aircraft serial numbers 23001 to 23370 inclusive. If the code is a three-digit number followed by a dash (371-), it means the effectivity would include 23371 and all subsequent aircraft. Furthermore, compound usage codes are explained in List 2 of this Introduction.

NOTE

Parts without a Usage Code are applicable to all aircraft.

FUEL TANK SPECIAL CODING

11 Aircraft serial numbers have not been applied against either the 100 or 167 gallon droppable fuel tank breakdowns. These breakdowns carry footnote coding which indicates the tank serial numbers.

AIRCRAFT APPLICABILITY

12 This issue of the Part List has been basically prepared for the Royal Canadian Air Force Sabre 5, 5A & 6 Aircraft, Serial Numbers 23001 and subsequent.

GROUP ASSEMBLY PART LIST

GENERAL

13 Part 2, the Group Assembly Part List, contains a Table of Contents, and illustrations with their accompanying compilation breakdowns.

PART 2 SECTIONING

14 Part 2 is divided into sections numbered consecutively. Each section such as Wing, Landing Gear, Fuel System, Electrical System, etc., lists all the installations, assemblies and detail parts pertaining to it, regardless of their position call-out on engineering drawings.

TABLE OF CONTENTS

15 The Table of Contents is a list of sections contained within Part 2. The section numbers are listed numerically with section titles and page numbers.

16 The Table of Contents for each section lists the figure numbers contained within the section, with figure titles and page numbers.

ILLUSTRATIONS

17 Refer to Paragraph 36, following.

COMPILATION

18 The compilation is printed on columned pages consisting of Figure and Index Number, Part Number, Nomenclature, Usage Code, and Units per Assembly columns.

FIGURE AND INDEX COLUMN

19 This column contains the Figure and Index numbers. Index numbers are listed in numerical sequence against assemblies and details requiring identification on the related illustration.

PART NUMBER COLUMN

20 In addition to normal part numbers, specification and type numbers are given where applicable. The word COMMERCIAL is used for items of hardware. Detail parts which have lost their individual identity as a result of having been fabricated into a permanent assembly, are not listed.

NOMENCLATURE COLUMN

21 The nomenclature shown in the Part List has been textually reproduced from the Engineering Drawing Title Block. Additional descriptive information, such as function, location, size, etc., may appear in parentheses following the nomenclature, in order to assist in identification.

USAGE CODE COLUMN

22 Parts with usage limitations are coded in this column as per Paragraphs 10 and 11. preceding.

UNITS PER ASSEMBLY COLUMN

23 Detail requirements shown in the Units per Assembly column are per assembly only. Assembly requirements are per installation and are generally the same as the total aircraft requirements. Each installation, being non-procurable, carries the letters NP. Items with varying requirements carry the letters AR (as required). Where REF appears, it indicates that the item is being referenced as per Paragraphs 30 and 31, following.

INDENTION

24 The item title indention in the nomenclature of the Group Assembly Part List is used to indicate the relationship between details and assemblies. Thus, parts with titles commencing in nomenclature column 2 are component parts of, and are assembled upon, the next preceding installation or assembly with

a title beginning in column 1. Part titles beginning in column 3 are component parts of, and are assembled upon, the next preceding part title commencing in column 2. In each instance the detail part or assembly must be within the same effectivity range as its next assembly. The breakdown continues in this pattern until all removable parts have been listed. This enables personnel to easily determine which parts may be stocked as assemblies, or details of assemblies.

25 On pages where the compilation breakdown ends, the symbol -000- will be found.

ALTERNATIVE PARTS

26 An alternative part is listed immediately following the part it may replace, and is separated from it by the word "OR" in the nomenclature column. No requirements are entered in the "Units per Assembly" column.

SPARE PARTS

27 In addition to production part numbers, the Part List lists spare part numbers in the part number column. These spare parts are listed immediately following their production items and are identified as: SPARE PART FOR....., in the same nomenclature indention column without requirements in the units per assembly column.

RCAF EO REFERENCES

28 Reference to RCAF EO numbers (AS PER EO...) is applied throughout the part list to either the nomenclature of specific items or to the bottom of the pages affected. When applied to specific items, the EO reference indicates that the inclusion of the item or assembly in the part list is the result of a completed modification authorized by the RCAF EO. When applied to the bottom of a Part List page, the EO reference indicates that the majority of items listed were included as the result of the RCAF EO. In either of the above situations, the modification has been completed on 95% of the aircraft affected by the RCAF EO.

29 When reference to RCAF EO numbers is (REMOVE ... AS PER EO ...) or (REPLACES ... AS PER EO...), it indicates that either the deletion or inclusion of the item is the result of an incomplete retrofit action authorized by the RCAF EO. The deleted or superseded item is listed for comparison purposes only.

REFERENCING

30 Referencing within a section of the Part List is applied by referring to figure number, eg: (SEE FIG. 10), in the nomenclature against the item title being referred for further breakdown. On this referenced figure the item is also referred to the originating figure. Where referencing is to be applied outside the section in which the referenced item is called, the reference will be to section only, eg: (SEE SECTION 14).

31 Referencing is also applied in the Part List for parts having a relationship between one or more figures. Thus, a fitting called up on the fuselage nose structure and which has a relationship to the nose gear, will be listed at the end of the nose gear breakdown with its item title in the first column of the nomenclature, and have a reference back to its originating figure or section.

CONTINUED BREAKDOWNS

32 An engineering drawing embodying one or more systems, and therefore pertaining to one or more sections will show, at the end of each figure breakdown, a reference to the figure or section in which the drawing breakdown continues. This is also true for the engineering drawings embodying too large a portion of the aircraft for one illustration. In these continued figures, regardless of the section in which they may appear, the drawing title will be kept, REF will be shown in the Units per Assy column, and the originating figure or section will be indicated in parentheses in the nomenclature. The Illustration title and Major Assembly title will indicate the correct system, function, and location.

NOTE

The next assembly for any given part in all breakdowns is always shown, and referenced where necessary to the figure or section where it originated.

HANDED ASSEMBLIES

33 Left and right handed assemblies and detail parts are identified by port and starboard

or LH and RH respectively at the end of the nomenclature title. The breakdown and the attaching parts for identical or nearly identical LH and RH assemblies, cover one of the assemblies only. The differing items, if any, are listed as (LH) and (RH). When handed assemblies differ materially, a separate breakdown with an illustration is given.

ATTACHING PARTS

34 Attaching parts are listed immediately following, and in the same indention column, as the assembly or item they serve to attach.

NOTE

Attaching parts must always be ordered separately, since they are not details of the assembly.

PURCHASED PARTS

35 Parts purchased by Canadair Limited, to vendor's drawings or specifications, are not broken down in the Part List. However, where applicable, the engineering order number is given against the purchased part assemblies for which a compilation breakdown can be obtained.

ILLUSTRATIONS

GENERAL

36 Illustrations, which accompany each compilation breakdown, normally show the left hand installation or assembly breakdown with corresponding item indices for identification purposes.

LOCATION OF PART ON AIRCRAFT

37 The blackened area on a small aircraft outline drawing which may be located in either of the upper corners of the illustration, indicates the location of the pertinent assembly in the aircraft.

EXPLODED VIEWS

38 Exploded views are used for the following purposes:

(a) To illustrate parts in greater detail.

(b) To illustrate parts used only on right hand installations or assemblies.

(c) To illustrate hidden items.

(d) To illustrate parts of different conformation and effectivities.

CODING

39 Illustrations that are applicable or restricted to certain aircraft have the aircraft effectivity shown in parentheses beneath the illustration title. Individual parts or assemblies applicable to certain aircraft carry coding signals, which are decoded on the illustration.

DRAWING NUMBERING SYSTEM

GENERAL

40 Regular drawing numbers listed in the Part List were created either by Canadair Limited or North American Aviation.

CANADAIR DRAWING NUMBERS

41 The Canadair drawing number system serves two purposes, and is therefore divided into two by a dash. The prefix designates the aircraft model, while the number following the dash is the basic function number.

MODEL NUMBER

42 The aircraft model number - or drawing prefix - indicates the aircraft for which the part was designed, however, a part designed originally for one model may be used on other models.

BASIC FUNCTION NUMBER

43 The basic function number is determined by the aircraft component. Thus, wing drawings are assigned numbers in the 10,000 series, fuselage drawings in the 30,000 series and power plant drawings in the 60,000 series, etc.

NORTH AMERICAN DRAWING NUMBERS

44 North American drawing numbers serve the same purposes as Canadair drawing numbers, as explained in Paragraph 41, preceding. However, in order to differentiate between Canadair redesigned part numbers and NAA part numbers for the same model, the Canadair prefix numbers are 13-, 13A- or 13B- in lieu of NAA's prefix numbers 170-, 172-, 193-, etc.

STANDARDS

CANADAIR STANDARDS

45 Canadair Standard part numbers are prefixed by the letter S and are further identified in the nomenclature by (CAN).

NOTE

Part numbers other than Canadair Standards having a letter S prefix are designated in the nomenclature by a Vendor Code.

NORTH AMERICAN STANDARDS

46 NAA Standard part numbers consist of a number, a letter and another number. The letter is the same as the first letter of the descriptive noun identifying the part. In some instances the basic number is the complete part number while in other cases a dash number coding is added to completely define the size and material, etc. For example: 4B12-2, 5B7, 7S4-10-10.

SPECIFICATION STANDARDS

47 Following is a list of other approved standard designations:

	STANDARD	DESIGNATION
(a)	Military Standards	MS
(b)	Air Force-Navy	AN
(c)	United States Air Force	USAF
(1)	Air Force	AF
(2)	Army-Air Force	AAF
(3)	Naval Aircraft Factory	NAF
(d)	National Aircraft Standards Committee	NAS

FINDING AN ITEM IN THE PART LIST

GENERAL

48 Both the Numerical Part List and the List of Illustrations are employed in finding an item in the Part List.

FINDING AN ITEM WHEN PART NUMBER IS KNOWN

49 To find an item when the part number is known, proceed as follows:

(a) Turn to Part 5, the Numerical Part List, and find the desired part number.

(b) Note the figure number, and index number where given. (Not all items carry an index number.)

(c) Turn to the noted figure to obtain the desired information.

FINDING AN ITEM WHEN PART NUMBER IS UNKNOWN

50 To find an item, the function or next assembly of which is known, but the part number unknown, proceed as follows:

(a) Turn to the list of Illustrations, locate the next assembly and note the page number.

(b) Turn to the indicated page number.

(c) Locate the item on the illustration.

(d) Note the index number (refer to (f) following).

(e) In the accompanying breakdown the part number and title will be found against the index number.

(f) An unindexed part which is illustrated may be found with its assembly, or, if the assembly is referenced, it may be found in the referenced figure.

PROPRIETARY NAMES AND ADDRESSES

GENERAL

51 List 1 of the Introduction is a complete list of proprietary names and addresses of manufactureres whose products are used on the Sabre 5, 5A & 6 aircraft, and which are called up in the Part List.

LOCATING A PROPRIETARY VENDOR'S NAME AND ADDRESS

52 By noting the code letters, as explained in Paragraph 6, preceding, the Proprietary

vendor's name and address may be determined by reference to the Proprietary Names and Addresses List.

SPECIAL SERVICE TOOLS

GENERAL

53 Part 3, Special Service Tools, contains a Table of Contents, and illustrations with their acompanying compilation breakdowns for those special tools and ground handling equipment purchased by the RCAF for the Sabre 5, 5A & 6 aircraft.

TABLE OF CONTENTS

54 The Table of Contents for Part 3 lists the figure numbers numerically, with titles and page numbers.

ILLUSTRATIONS

55 Refer to Paragraph 36, preceding.

BULK MATERIAL CHART

GENERAL

56 Part 4, the Bulk Material Chart, gives the required information to make up from stocked material tube assemblies of 3/4 inch outside diameter and under, which are called up in Part 2.

57 Chart 3, Specifications - Commercial Designations of Tubing, is for reference purposes only.

LISTING ARRANGEMENT

58 Listing is per system breakdown with the part numbers in numerical order.

TUBE DIMENSIONS

59 The tube size is in fractions of an inch (outside diameter), gauge in decimals of an inch and straight length in inches and fractions of an inch.

MATERIAL SPECIFICATION

60 This column contains the following information:

(a) First Line: Company material specification.

(b) Second Line: RCAF stocked material specification.

(c) Third Line: RCAF reference number.

NUMERICAL PART LIST

GENERAL

61 Part 5, the Numerical Part List, is compiled in sequence according to PROC 100-8. This List consists of a Part Number column, a Figure and Index column, and a Quantity column.

PART NUMBER COLUMN

62 The Part Number column, appearing in each sub-division of a page, contains the item part numbers as given in the Group Assembly Part List and the Special Service Tool List.

FIGURE AND INDEX COLUMN

63 This column lists the figure and index numbers as given against the relevant items in Part 2 and Part 3.

QUANTITY COLUMN

64 The Quantity column summarizes the call-outs in Part 2 and Part 3, but is not necessarily the total quantity per aircraft.

ALTERNATIVE AND SPARE NUMBERS

65 Parts listed in the Numerical Part List, for which requirements in the Quantity per Aircraft column are not shown, are the parts called out in Part 2 as alternative or spare parts, (refer to Paragraphs 26 and 27, preceding).

NOMENCLATURE ABBREVIATIONS AND CONTRACTIONS

GENERAL

66 List 3 supplements and follows the principles of 33-GP-2P, Interim Schedule of Abbreviations.

LIST 3 CANADAIR ABBREVIATIONS AND CONTRACTIONS

A

AC	ALTERNATING-CURRENT
ACC	ACCESS
ACCUM	ACCUMULATING, OR
ACFT	AIRCRAFT
ACTE	ACTUATING, OR
ADJ	ADJUSTABLE, ING, MENT
ADPT	ADAPTER
AI	ANTI-ICING
AIL.	AILERON
ALC	ALCOHOL
ALT	ALTITUDE
ALTR	ALTERNATE, ING, OR
AMO	AMMUNITION
AMP	AMPERE
AMPL	AMPLIFIER
ANT.	ANTENNA
A/PRESS	AIR-PRESSURE
ARTL	ARTIFICIAL
ASSY	ASSEMBLY
ATM	ATMOSPHERE
ATO	ASSIST TAKE-OFF
ATT	ATTACHING, MENT
AUTO	AUTOMATIC
AUX	AUXILIARY
AVB	ANTI-VIBRATOR

B

BAL	BALANCE
BAT.	BATTERY
BELCRK	BELL-CRANK
BHD	BULKHEAD
BL	BUTTOCK LINE
BOT.	BOTTOM
BP	BUTTOCK PLANE
BRG	BEARING
BRKDN	BREAKDOWN
BRKT	BRACKET
BSTR	BOOSTER

C

CAL	CALIBRE
CBAL	COUNTERBALANCE
CDT	CONDUIT
CHAN	CHANNEL
CHG	CHARGE, ING
CHGR	CHARGER
CH/OV	CHANGE-OVER
CKPT	COCKPIT
CKT	CIRCUIT
CKT/BKR	CIRCUIT-BREAKER
COAX.	COAXIAL
COMB.	COMBINATION
COMP	COMPASS
COMPL	COMPLETE
COMPR	COMPRESSION, OR
COMPT	COMPARTMENT
COMPTR	COMPENSATOR
CONN	CONNECTING, OR
CPLG	COUPLING
CRE	CORROSION-RESISTANT
CSK	COUNTERSUNK
CTL	CONTROL
CTL/SURF	CONTROL SURFACE
CTR	CENTRE, CENTRING
CTR/SECT	CENTRE SECTION
CTR/W	CENTRE WING
CU/IN	CUBIC INCH
CV	CHECK VALVE
CYL	CYLINDER

D

DBLR	DOUBLER
DC	DIRECT-CURRENT
DEG	DEGREE
DEMAGN	DEMAGNETIZED
DESIG	DESIGNATION
D/FOG	DEFOGGING
D/FR	DEFROSTING
DIAGL	DIAGONAL
D/ICE	DE-ICER, ING
DIFF	DIFFERENTIAL
DISC.	DISCONNECT, ING, OR
DISCH	DISCHARGE
DP	DOUBLE-POLE
DTCH	DETACHABLE
DWG	DRAWING
DWNLK	DOWNLOCK

E

EFF	EFFECTIVE, ITY
EJ	EJECTION, OR
ELEC	ELECTRICAL
ELECT.	ELECTROLYTIC
ELEVR	ELEVATOR
ELL.	ELBOW
EMP	EMPENNAGE
EMY	EMERGENCY
ENCL	ENCLOSURE
ENG	ENGINE

EQUIP.	EQUIPMENT
EXCH	EXCHANGER, ING
EXH	EXHAUST
EXT	EXTERNAL
EXTN	EXTENDED, SION

F

FAIR.	FAIRING
F/DETN	FIRE DETECTION
FIG.	FIGURE
FIX.	FIXTURE
FL	FLOOR
FLD	FAIRLEAD
FLEX.	FLEXIBLE
FLT	FILTER
FRA	FRAME
FRAG	FRAGMENTATION
FRIC	FRICTION
FRT	FRONT
FT	FOOT, FEET
FTG	FITTING
FUS	FUSELAGE
FUT	FUTURE
FWD	FORWARD

G

GA	GAUGE
GAL	GALLON
GBR/SIGHT	GUN-BOMB-ROCKET SIGHT
GD	GUARD
GEN	GENERATOR
GR	GEAR
GRD	GROUND
GSAP	GENERAL SERVICE AERIAL PHOTOGRAPHY
GYRO	GYROSCOPE

H

HD	HEAD
HEX	HEXAGON
HNG	HINGE
HOR	HORIZONTAL
HOR/STAB	HORIZONTAL STABILIZER
H/PRESS	HIGH PRESSURE
HTR	HEATER
H/VENT	HEAT & VENT
HYD	HYDRAULIC

I

IDENT	IDENTIFICATION
IFF	IDENTIFICATION FRIEND OR FOE
IMP.	IMPERIAL
IMPG	IMPREGNATED
IN.	INCH, ES
INBD	INBOARD
IND	INDICATING, OR
INFL	INFLAMMABLE
INJ	INJECTION
INSP	INSPECTED, ION
INST	INSTRUMENT
INSTL	INSTALLATION
INSTN	INSTRUCTION
INT	INTERNAL
INTCHG	INTERCHANGEABLE
INTER	INTERMEDIATE
INTERCONN	INTERCONNECT, ING, OR
INTERCST	INTERCOSTAL
INVT	INVERTER

J

JATO	JET ASSIST TAKE-OFF
JCT	JUNCTION
JETT	JETTISON

L

LDG	LANDING
LDG/GR	LANDING GEAR
LE	LEADING EDGE
LEV	LEVELLING
LH	LEFT HAND
LIQDMTR	LIQUIDOMETER
LKG	LOCKING
LONGN	LONGERON
L/SW	LIMIT SWITCH
LT	LIGHT
LWR	LOWER

M

MAN.	MANUAL
MANF	MANIFOLD
M/CONT	MOMENTARY CONTACT
MECH	MECHANISM
MED	MEDIUM
MK	MARK
M/LDG/GR	MAIN LANDING GEAR
MOD	MODIFICATION
M/P	MEDIUM PRESSURE
MPI	MAGNETIC PARTICLE INSPECTION
MT	MOUNT
MTG	MOUNTING

N

N/GR	NOSE GEAR
N/LDG/GR	NOSE LANDING GEAR
NO.	NUMBER
NOZ	NOZZLE
N/WHL	NOSE WHEEL

O

O/PNL	OUTER PANEL
OPR	OPERATING, OR
ORF	ORIFICE
OUT.	OUTLET
OUTBD	OUTBOARD
O/W	OUTER WING
OXY	OXYGEN

P

P/B	PUSH-BUTTON
PED	PEDESTAL
PLG	PLUNGER
PNEU	PNEUMATIC
PNL	PANEL
POSN	POSITION
POSNG	POSITIONING
POT.	POTENTIOMETER
PRESRZTN	PRESSURIZATION
PRESS.	PRESSURE
PROC	PROCUREMENT
PROT	PROTECTOR
PSI	POUNDS PER SQUARE INCH
PUL	PULLEY
PWR	POWER
PWR/CTL	POWER CONTROL

Q

QUADT	QUADRANT

R

RD/HD	ROUNDHEAD
RDR	RADAR
RDR/RGE	RADAR RANGE
RECP	RECEPTACLE
RECR/XMTR	RECEIVER-TRANSMITTER
RED.	REDUCER, ING
REF	REFERENCE
REINF	REINFORCING, MENT
REL	RELEASE
REM	REMOVABLE
REPL	REPLACING
RES	RESISTANCE, ANT, ING
RESTR	RESTRICTOR
RET	RETURN
RETR	RETRACTABLE
RGLR	REGULATOR
RH	RIGHT HAND
RPM	REVOLUTIONS PER MINUTE
RSRVR	RESERVOIR
RTNG	RETAINING
RTNR	RETAINER
RUB.	RUBBER, ING
RUD	RUDDER
RV	RELIEF-VALVE

S

SAF	SAFETY
SECT.	SECTION
SEL	SELECTOR
SEQ	SEQUENCE, ING
SGL	SINGLE
SOL	SOLENOID
SOV	SHUT-OFF VALVE
SP	SINGLE-POLE
SPDT	SINGLE-POLE DOUBLE-THROW
SPEC	SPECIFICATION
SPG	SPRING
SPST	SINGLE-POLE SINGLE-THROW
ST	SINGLE-THROW
STA	STATION
STAB.	STABILIZER
STBD	STARBOARD
STEER.	STEERING
STGR	STRINGER
STIFF.	STIFFENER, ING
STR	STRAIGHT
STRUCT	STRUCTURE, AL
SUP.	SUPPORT, ING
SUPES	SUPERSEDES, ING
SUPLD	SUPPLIED
SUR	SURFACE
SUR/CTL	SURFACE CONTROL
SW	SWITCH
SWL	SWIVEL
SYNC	SYNCHRONOUS, IZER, ING
SYS	SYSTEM

T

TACH	TACHOMETER
TE	TRAILING EDGE
TEMP	TEMPERATURE
TERM.	TERMINAL
THD	THREAD
THERMOC	THERMOCOUPLE
THROT	THROTTLE

TOG.	TOGGLE
TOL	TOLERANCE
TRANS	TRANSFER
TRNBKL	TURNBUCKLE
TRUN	TRUNNION

U

UF	MICROFARAD
UNIV/J	UNIVERSAL JOINT
UNLKG	UNLOCKING
UP.	UPPER
UPLK	UPLOCK
U/SW	MICROSWITCH
UT	UTILITY
UW	UNDERWING

V

VAL	VALVE
VDC	VOLT DIRECT-CURRENT
VERT/STAB	VERTICAL STABILIZER
VHF	VERY HIGH FREQUENCY
VLG	VOLTAGE

W

W	WATT
W/CTR/SECT	WING CENTRE SECTION
WHL/W	WHEEL WELL
WNDSHLD	WINDSHIELD
WOP	WING OUTER PANEL
WRH	WRENCHING
WVG	WAVEGUIDE

XYZ

XMTR	TRANSMITTER
XRI	X-RAY INSPECTED, ION

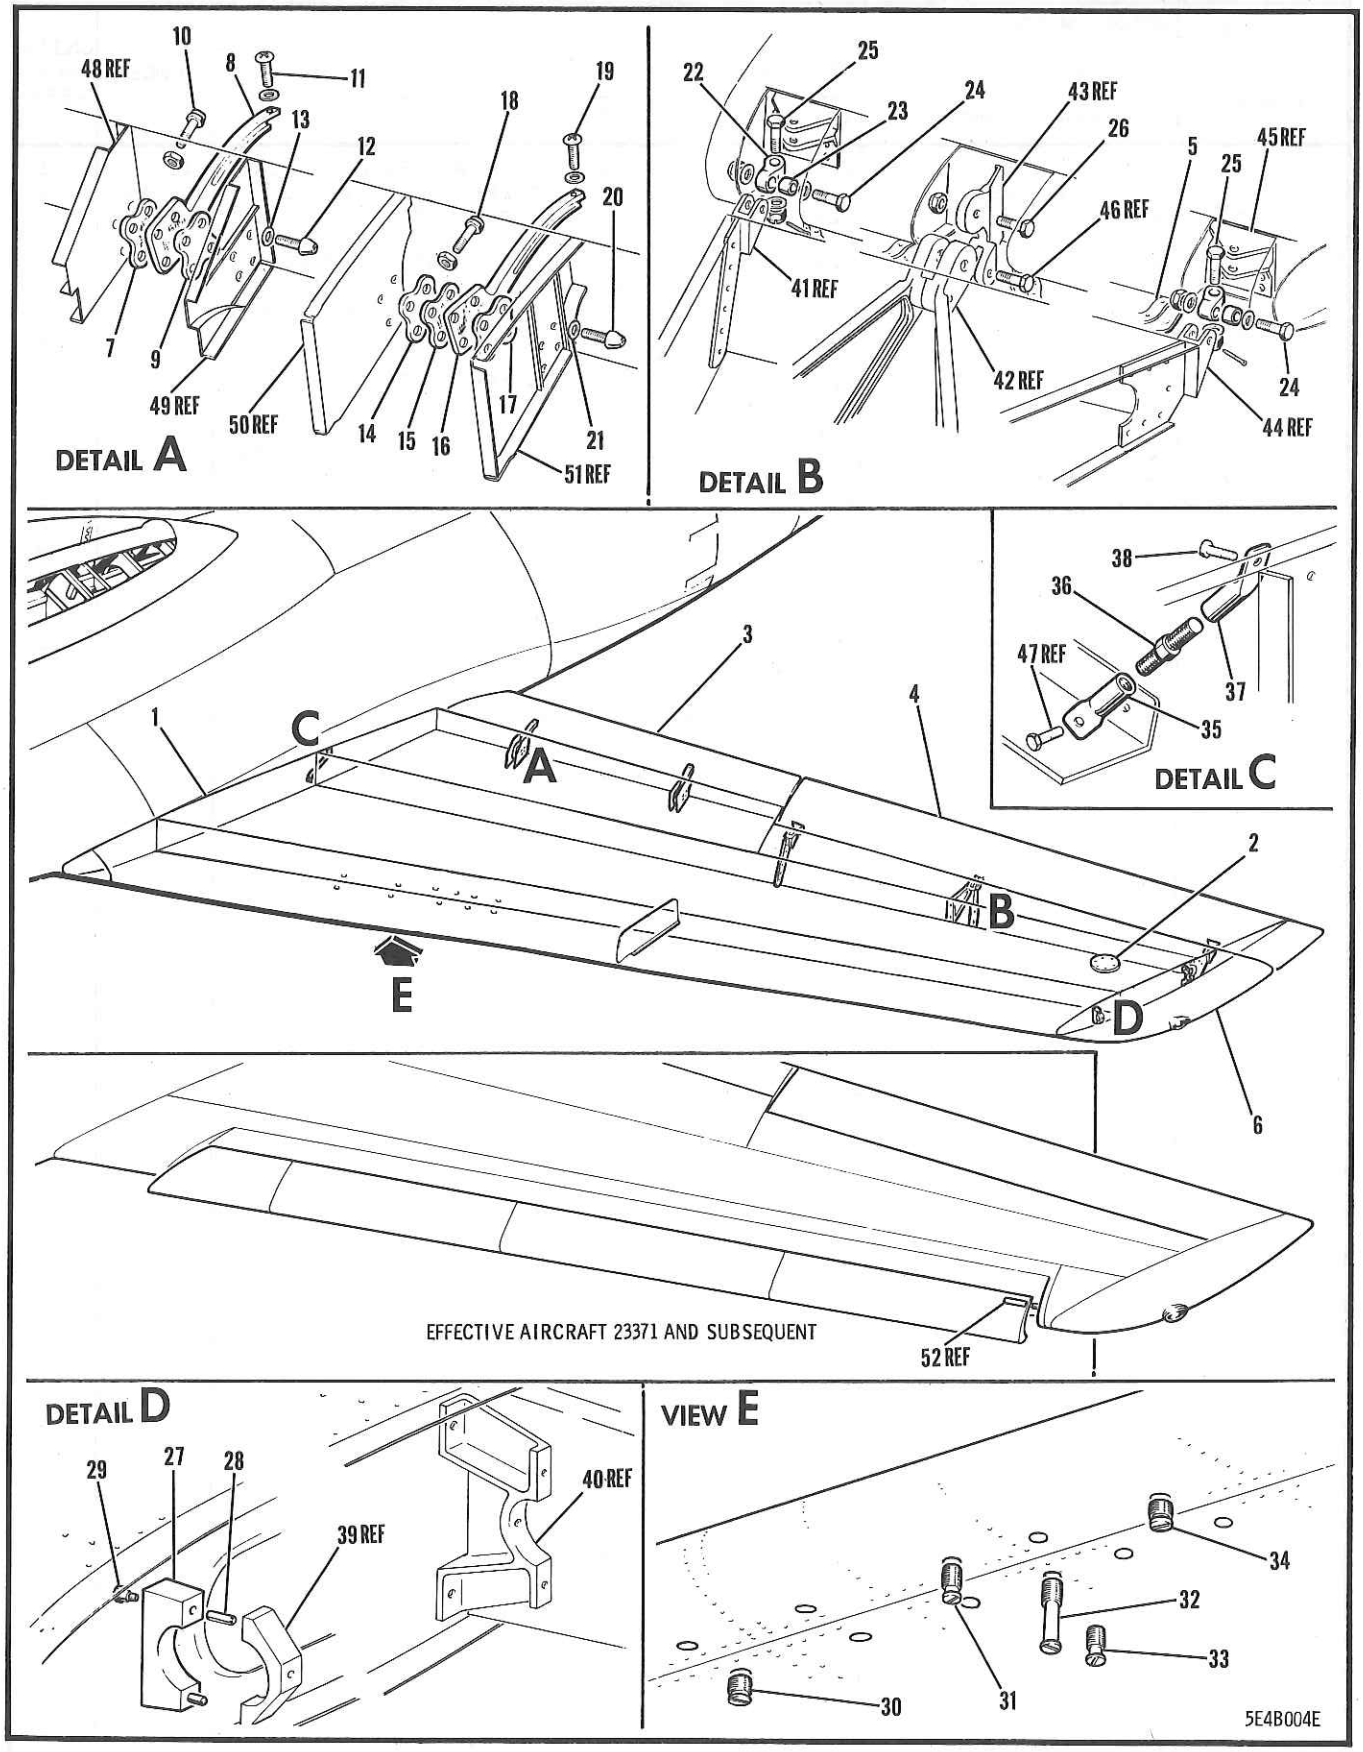

FIGURE 6 COMPLETE OUTER WING

ROYAL CANADIAN AIR FORCE

ADVANCE REVISION

Serial #9 dated 24 Mar 61
(Sheet 1 of 5)

(This Advance Revision replaces Advance Revision Serial #1)

The sheets of this Advance Revision are to be inserted in the EO as follows:-

Sheet 1 facing page 48
Sheet 2 facing page 48
Sheet 3 facing page 48
Sheet 4 facing page 55
Sheet 5 facing page 140

SABRE WING CONFIGURATION BREAKDOWN

The following information will be found very useful in instances where a replacement wing is required.

Wing Drawing	Production Effectivity	Spares Effectivity	Changes Incorporated and Comments
170-14001-803	23001 to 23040 incl.	23001 to 23370 incl.	Production wings also shipped as spares. Extended leading edge fitted.
170-14001-804	23001 to 23040 incl.	23001 to 23370 incl.	
170-14001-807	23041 to 23100 incl.	23001 to 23370 incl.	Production wing only Incorporates access hole for MLG trunnion pin locking bolt.
170-14001-808	23041 to 23100 incl.	23001 to 23370 incl.	
170-14001-805	23101 to 23200 incl.	23001 to 23370 incl.	Production wing only Incorporates larger diameter MLG trunnion locking bolts.
170-14001-806	23101 to 23200 incl.	23001 to 23370 incl.	
170-14001-809	23201 to 23300 incl.	23001 to 23370 incl.	Production wing only Incorporates fuel air indicating system for drop tanks.
170-14001-810	23201 to 23300 incl.	23001 to 23370 incl.	
170-14001-811	23211 to 23430 incl.	23001 to 23370 incl.	Production wing only. Incorporates deletion of manual release system.
170-14001-812	23211 to 23430 incl.	23001 to 23370 incl.	

ISSUED ON AUTHORITY OF THE CHIEF OF THE AIR STAFF

Wing Drawing	Production Effectivity	Spares Effectivity	Changes Incorporated and Comments
170-14001-813 170-14001-814	Not used	NA	Not used on production Spare wing configuration. Not procured by RCAF.
170-14001-815 170-14001-816	Not used	NA	Not used on production Spare wing configuration. Not procured by RCAF.
170-14001-817 170-14001-818	Not used	NA	Not used on production Spare wing configuration. Not procured by RCAF.
170-14001-819 170-14001-820	Not used	NA	Not used on production Spare wing configuration. Not procured by RCAF.
170-14001-821 170-14001-822	Not used	23001 to 23370 incl.	Spare configuration only. Complete electrical wiring and external marking. Procured as spares.
170-14001-823 170-14001-824	23431 to 23530 incl.	23371 and subs	Production wing only. This bank of Aircraft were modified in accordance with 6B/9.
170-14001-825 170-14001-826	Not used	NA	A spare configuration not procured by RCAF.
170-14001-827 170-14001-828	23621 to 23747 incl. 23611 to 23747 incl.	23371 and subs 23371 and subs	Production wing - modified to deletion of 12" wing tip extension prior to delivery. Have slatted edge and reinforced main spar.
170-14001-829 170-14001-830	23531 to 23610 incl. 23531 to 23610 incl.	23001 to 23370 incl. 23001 to 23370 incl.	Production wing. EO 05-5E-6B/7 incorporated.
170-14001-831 170-14001-832	Not used	23001 to 23370 incl. 23001 to 23370 incl.	Spare configuration.

Wing Drawing	Production Effectivity	Spares Effectivity	Changes Incorporated and Comments
170-14001-833 170-14001-834	Not used	23371 and subs 23371 and subs	Spare configuration. Procured by RCAF. Slatted LE and reinforced main spar incorporated.
170-14001-835	23611 to 23620 incl.	23371 and subs	Production wing with changes to 170-14601 panel. Modified for deletion of 12" wing tip extension. Has slatted leading edge and reinforced main spar.
170-14001-837 170-14001-838	23748 to 23784 incl. 23748 to 23784 incl.	23371 and subs 23371 and subs	Production wings. Have slatted LE and changes in the aileron assembly.
170-14001-839	Not used	NA	Spare wings. Not procured by RCAF.
170-14001-847 170-14001-848	23785 and subs 23785 and subs	23371 and subs 23371 and subs	Modified to delete 12" extended wing tip. Have slatted LE.
170-14001-849 170-14001-850	NA	23371 and subs 23371 and subs	Spare configuration created to provide a spare slatted LE wing for Mk. 6 aircraft. Have latest aileron, flap and external markings.
170-14001-851	NA	23001 to 23370 incl. 23001 to 23370 incl.	Spare configuration created for Sabre 5 aircraft. Have latest aileron, flap and external markings.

NOTE

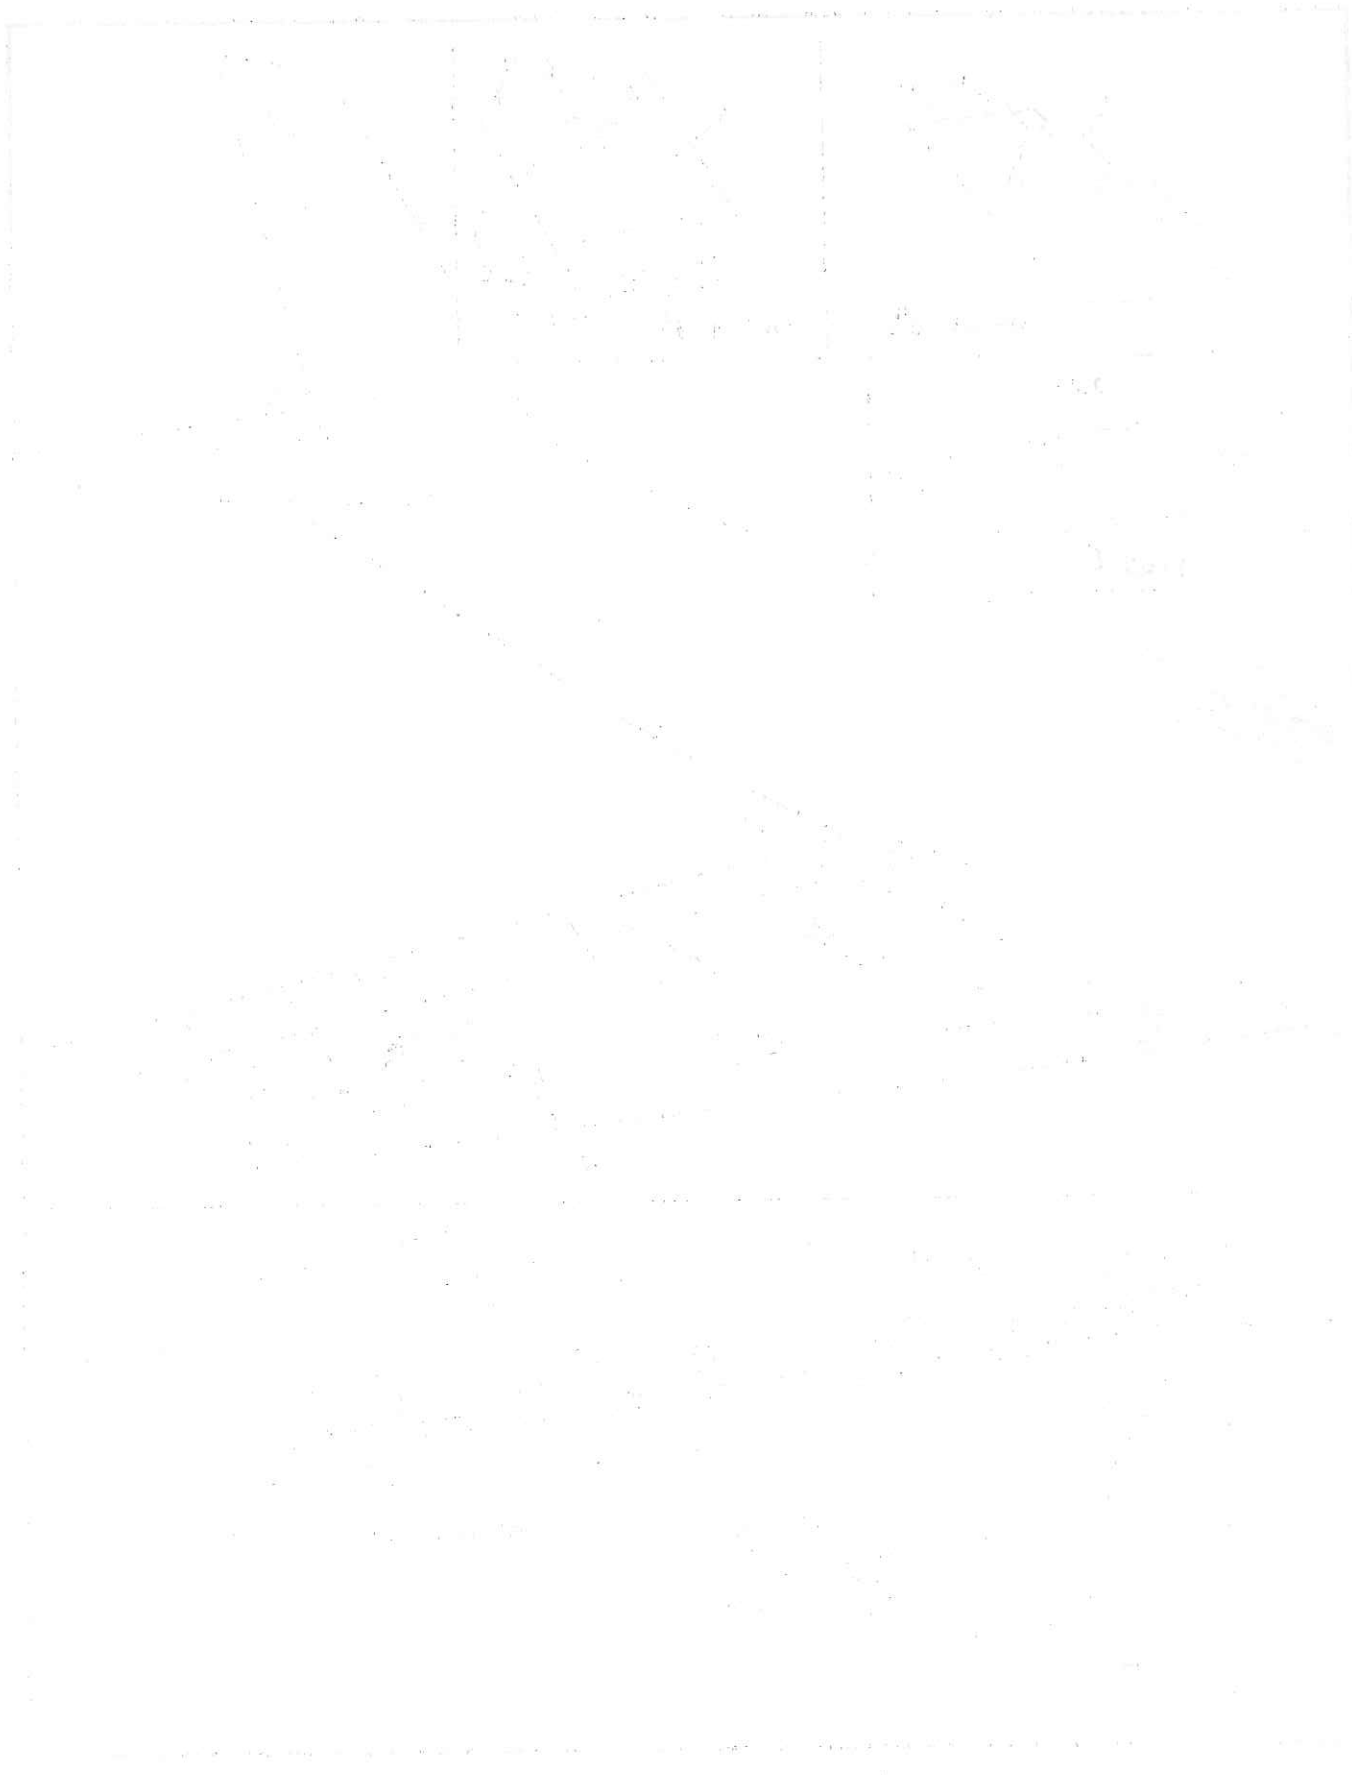

-829 and -830 wings modified IAW 6B/9 will be used for spares effectivity 23371 and subs only.

ADVANCE REVISION

Serial #2 dated 15 Jun 59
(Sheet 1 of 7)

The sheets of this Advance Revision are to be inserted in the EO as follows:

Sheet 1 facing page 169
Sheet 2 facing page 179
Sheet 3 facing page 837
Sheet 4 facing page 838
Sheet 5 facing page 839
Sheet 6 facing page 840
Sheet 7 facing page 938

Top of page after Part 170-20001 insert the following:

K13-120 Kit - Elevator Linkage Assembly.

ISSUED ON AUTHORITY OF THE CHIEF OF THE AIR STAFF

ADVANCE REVISION

Serial #14 dated 24 Mar 61
(Sheet 1 of 1)

(This Advance Revision replaces Advance Revision Serial #6)

The sheet of this Advance Revision is to be inserted in the EO as follows:-

Sheet 1 facing page 576

Item 23 Part number to read BL-CL4-15 in lieu of BL-CL4-1 in two places.

ISSUED ON AUTHORITY OF THE CHIEF OF THE AIR STAFF

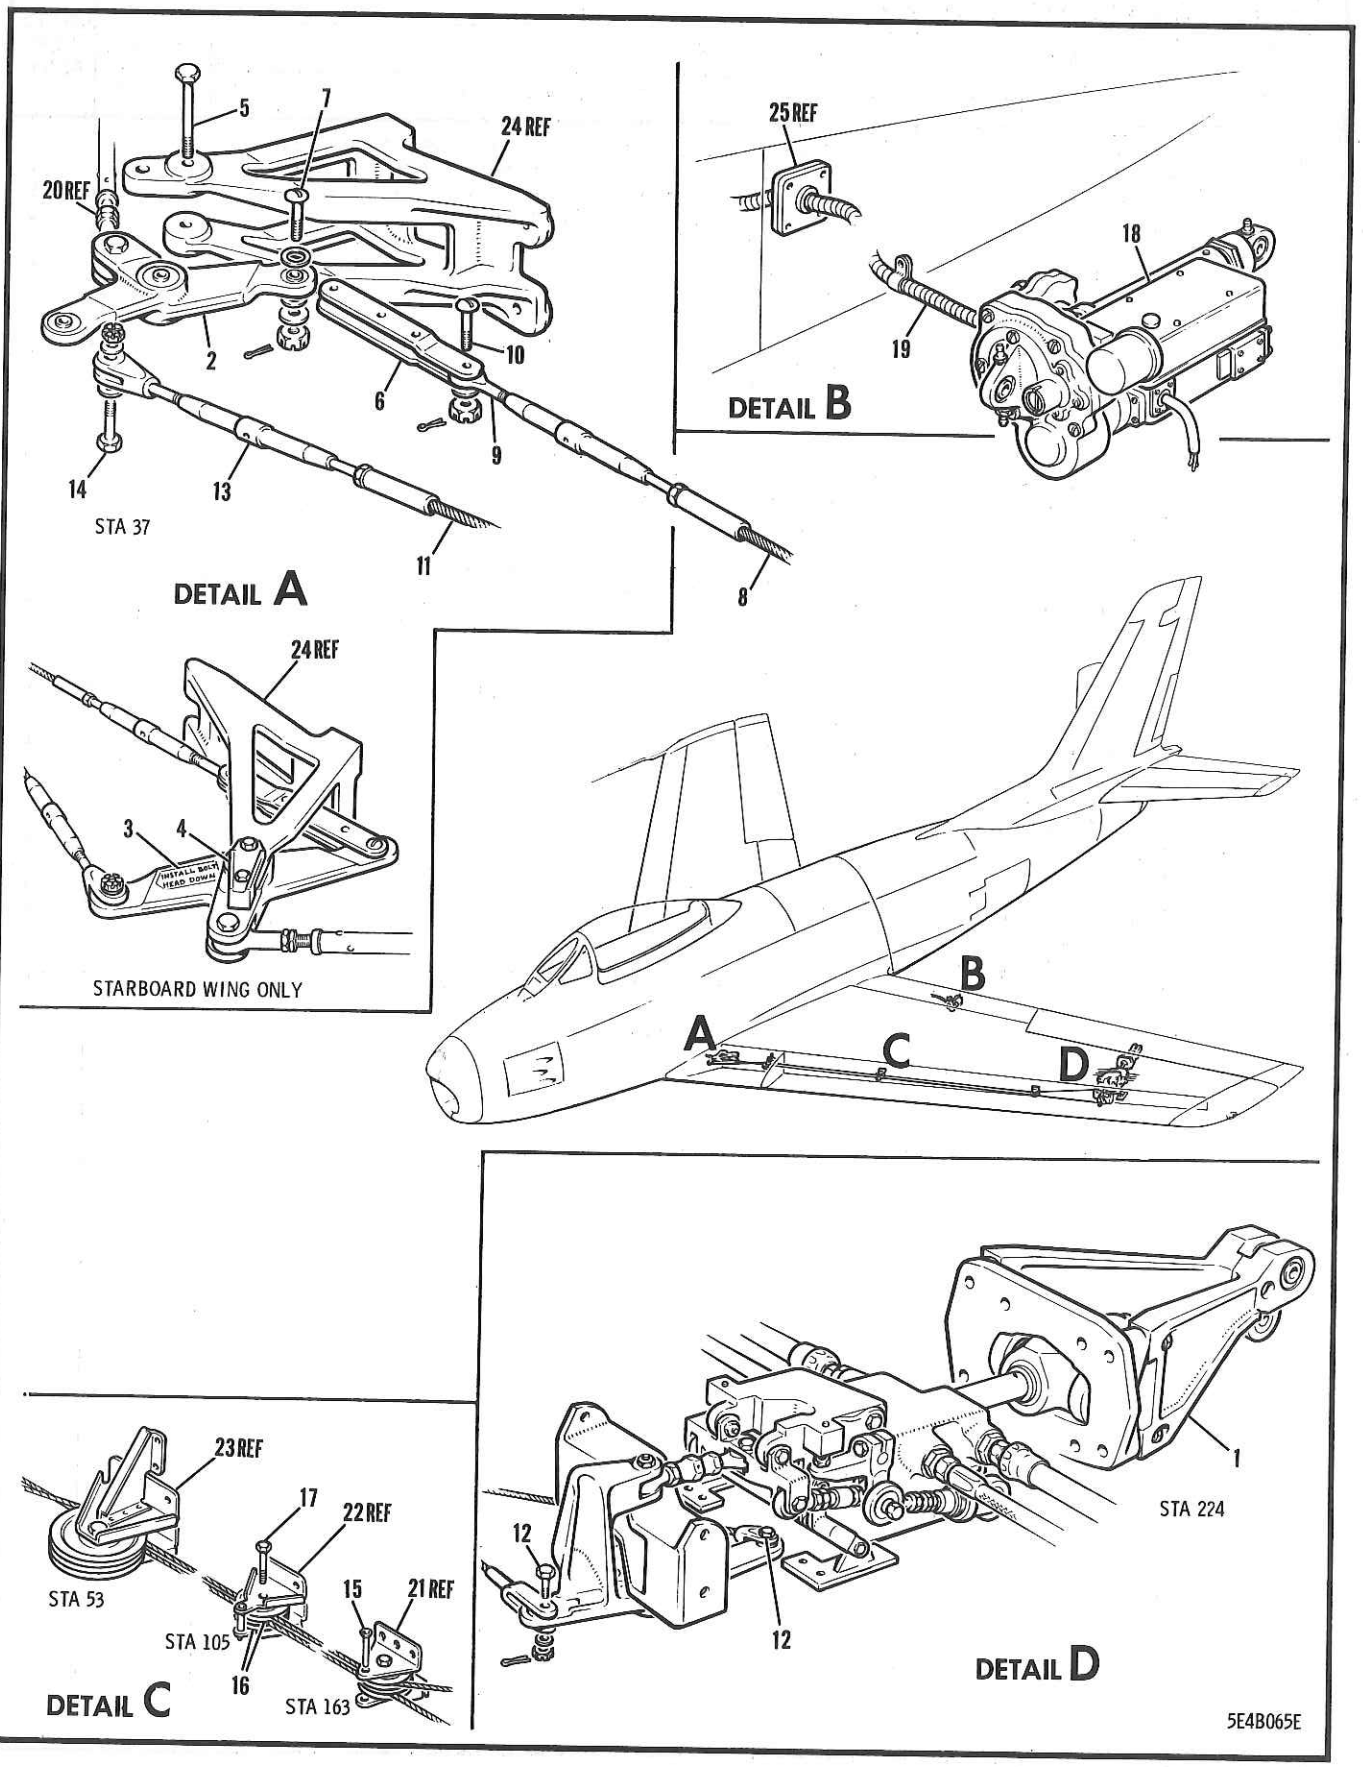

FIGURE 128 OUTER WING SURFACE CONTROL

Stanyar Bellan

Orenda 5

ROYAL CANADIAN AIR FORCE

EO 05-5E-4

17 Feb 58

ADVANCE REVISION

Serial # 5 dated 25 Nov 58

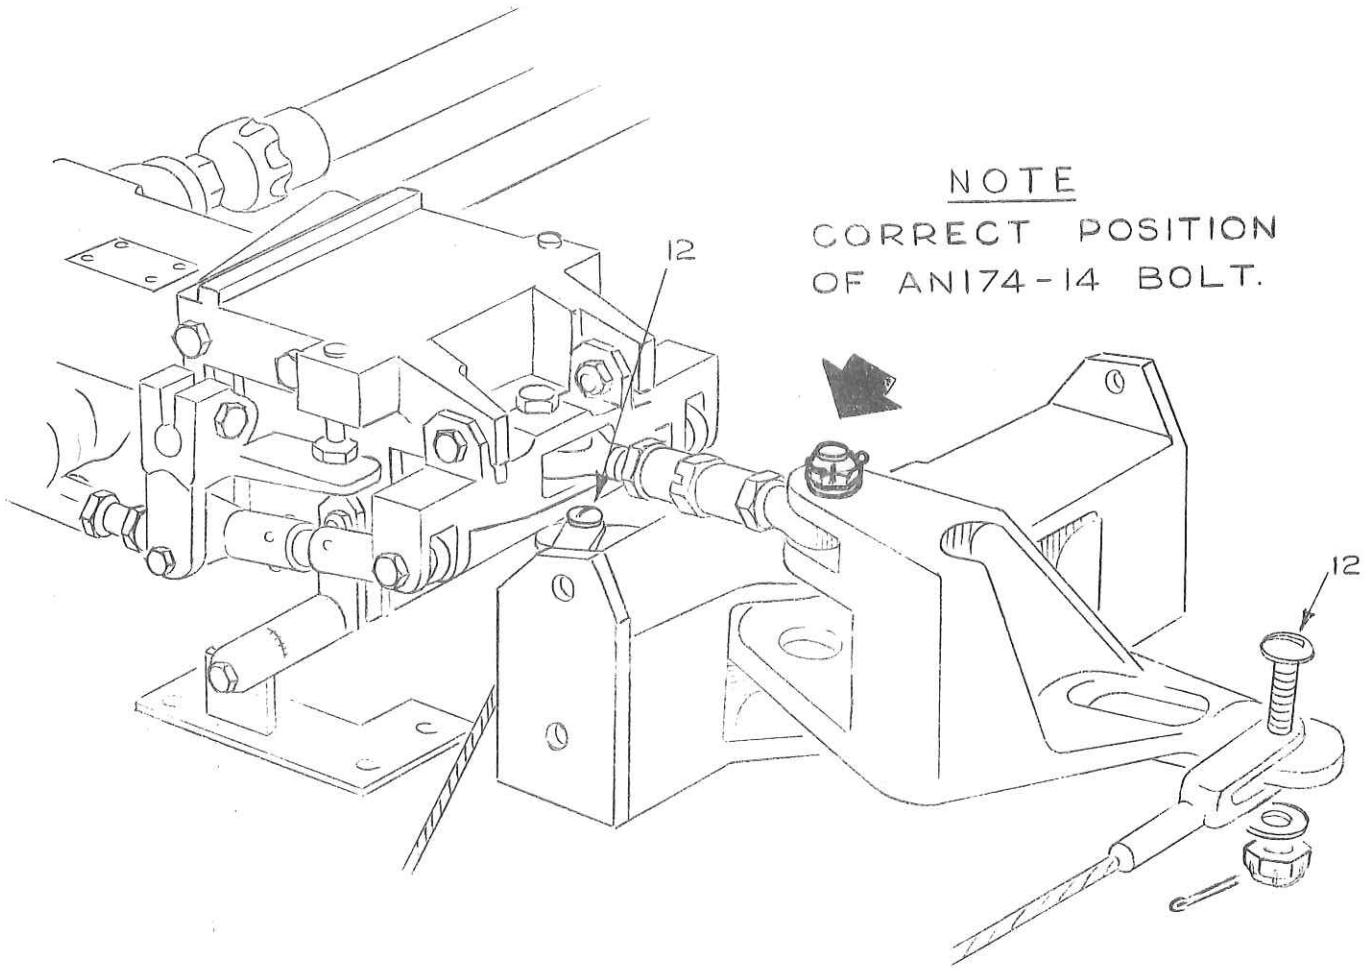

(Sheet 1 of 1)

The sheet of this Advance Revision is to be inserted in the EO as follows:

Sheet 1 facing page 604

Detail of Figure 128 Outer Wing Surface Control

The following sketch illustrates the correct installation of bolt AN174-14 attaching the RH aileron control rod to the centre wing bellcrank. There is no change in text breakdown.

ISSUED ON AUTHORITY OF THE CHIEF OF THE AIR STAFF

ROYAL CANADIAN AIR FORCE

EO 05-5E-4

17 Feb 58

ADVANCE REVISION

Serial # 5 dated 25 Nov 58

(Sheet 1 of 1)

The aileron control rod is to be inserted in the EO as follows:

Sheet 1 facing page 004

Detail of Figure 12B Outer Wing Surface Control

The following sketch illustrates the correct installation of bolt AN174-14 attaching the RH aileron control rod to the centre wing bellcrank. There is no change in text breakdown.

ISSUED ON AUTHORITY OF THE CHIEF OF THE AIR STAFF
