Target not attacked. No cloud - good visibility. Although target was identified, Controller would not let us bomb as the red and green T.I.'s were not backed up. After orbiting for about 27 minutes we were attacked by fighter position 54°ON 2100E at 01.42 hrs - 20,000'. After being forced down to 2000' to get out of a cone, fighter attacked from dead astern. Three strikes were observed by cannon fire, one in the mid upper turret which smashed one gun and set turret alight, one shell went through bomb doors into Bomb Aimers compartment starting another fire, the other shell grazed side of fuselage. Controllers stubbornness considered to be main reason for high casualties on this raid. Backers up told him markers were O.K., but he still kept main force orbiting for half an hour.
